About Us

QUICK SOLUTION
"One Stoppage for all Technologies"

Quick Solution is all about technology, excellence, quality, flexibility and passion. With a Team of seasoned professionals in our domain we are committed to turn your "Concept into Reality". The Company was established in the year 2009 and is poised to grow steadily in the coming years based on the strength of its product quality, emphasis on customer satisfactions, strong leadership and a motivated workforce with a dedicated team of developers, system analyst, hardware and network engineers, Operators, electricians.

Objectives

Quick Solution aims to advance business with tech, ensure global security, deliver top-notch IT benefits, prioritize satisfaction, support brand, and drive innovation.

Service Quality

Customer is our top priority. Uncompromising quality, efficient service, and a strong, intelligent team for prompt solutions.

Experience

Experienced skills and technical expertise drive quality performance for multiple clients. Our aim is customer satisfaction, crafting solutions tailored to their needs.

Quality Design

Quality is our business plan. Continuous effort for tomorrow's success is our commitment.

Our Services

Innovative solutions powered by cutting-edge and adaptive technology.

QUICK SOLUTION
"One Stopage for all Technologies"

IT Consultation

We have knowledgeable professionals and we provide strategic advice on using technology to achieve business goals. We understand customer requirements, manage IT initiatives, troubleshoot technical issues, and provide training and support. Strong technical expertise, problem-solving skills, and excellent communication are our major key. We understand client and customer requirements and business objectives, providing strategic advice on utilizing technologies to achieve goals. We will play a pivotal role in helping individuals and business develop, utilize and integrate IT systems. By resolving technical problems and providing comprehensive user training, we try to enable our clients to maximize the value of technology in their business operations.

QUICK SOLUTION
"One Stoppage for all Technologies"

Hardware Installation

We believe in the installation flow chart and procedures comply with local laws and regulations while performing operations on a device. All Safety precautions in the operation are checked twice before we proceed. Only qualified and trained engineers are allowed to install, operate, and maintain such equipment. We ensure our staff and correspondent to follow the instruction guided in the given manual by the equipment company before proceeding to any hardware installation.

Network Infrastructure Management

We provide solutions that are designed to use standard networking protocols to help maintain, monitor and discover network elements, provision network based services and deploy new hardware and software components. We also provide solutions use agent-based management installed on network servers and devices that report back on important metrics and statuses to provide more in-depth metrics that are built to offer both agent-based and agent less monitoring to leverage the advantages of both approaches. We also support our clients and customers in helping design to plan an IT network more efficiently. Since an organization relies on its IT network to run mission-critical applications and business operations, we ensure the underlying network infrastructure is reliable, safe, robust, and scalable is crucial.

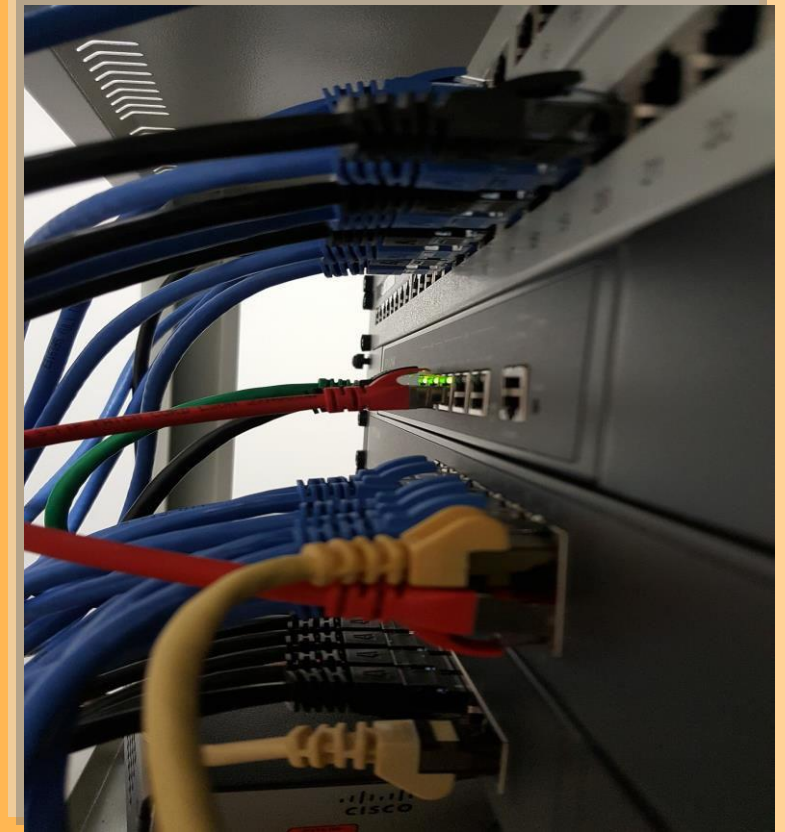

QUICK SOLUTION

Network Set up

We provide networks set up in LAN, WAN, MAN, VLAN, CAN, PAN etc in flow and operation to support the network communication of an organization and or network owner. We incorporate multiple configuration in Layer1, Layer2 and Layer3 using our various skill types and advanced technologies and processes on a network hardware, software and other supporting devices and components. Our network configuration refers to the organization, governance, and maintenance of network with the right set of controls and policies.

QUICK SOLUTION
"One Stopage for all Technologies"

Network Security

We also involve in activity designed to protect the usability and integrity of network and data. We use both the technology hardware and software that helps us to target a variety of threats. We help an organization and individuals affecting threats stopping them from entering and spreading on the network. We use various tools in form of hardware and software and help our clients and customers protecting huge stored data and networks in layers that ensure the bedding of rules and regulations in physical, technical and administrative network security.

Desktop and Laptop Repair

We involve in the process of identifying, processing and resolving problems and issues in a faulty computer system. We have a broad field of encompassing many tools, techniques and procedures used to repair computer hardware and software problems. We put our expert engineers and expertise, resources and skills into practice all types of faulty system, from distinctive architecture to everyday technology and infrastructure.

Printer Repair

We offer comprehensive maintenance and repair services for computer printers and plotters, specializing in solid ink and toner-based laser printers. With expert tools, we diagnose and resolve printer issues, providing on-site repairs, repair vouchers, maintenance contracts, workshops, installations, training, advice, replacements, consumable sales, and spare parts supply.

QUICK SOLUTION
"One Stopage for all Technologies"

Technical Support

We support our client in configuring operating systems, troubleshooting any technical issue related to hardware and software or any network issues. We enhance providing our customer with resolution choices and help them resolve technical problems themselves.

Cloud Computing

We deals cloud computing with Amazon web services, Microsoft Azure, Google cloud platform, VMware etc to provide our clients and customers self- provisioning and elasticity with provision that a user can access to data or upload data to the cloud from anywhere with the internet connection using any device. We ensure every customer using these services with effective of cost management, data and workload mobility, business continuity and disaster recovery, speed and agility and environment sustainability.

Software Development

Our one set of team activity is dedicated to the process of creating, designing, deploying and supporting software. We create customize software according to what meets the client and customer needs. We use Java, Python, C, MySQL, AWS, and Azure etc. we design and develop billing software, Hotel Software, Hospital Software, School and colleges software or any Private and Corporate software.

CCTV

We provide video surveillance system with both analog and IP based technologies. We reassure the public about the community safety. We customize a complete solution for campus security with the help of various tools and sensors. Our configuration method will also allow you to view the location widely and wirelessly.

EPABX/IP-PBX/IVR

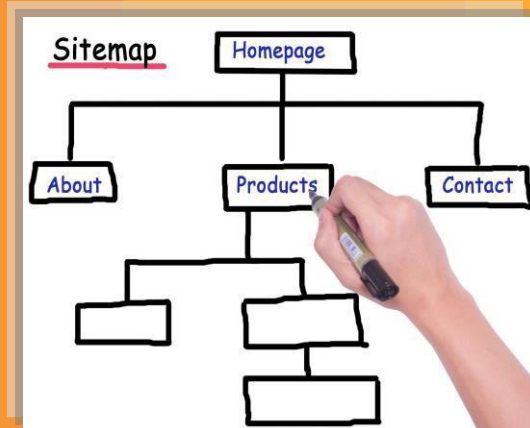

We deliver advanced telecommunication services with EPABX and IP-PBX technologies for efficient business phone systems. Our solutions include configuring IVR systems, enabling users to manage tasks and facilitating seamless communication within an organization and with the external world through telephone lines.

WiFi Management

We ensure QoS, secure Wi-Fi campus configuration, and robust network authentication for safe and efficient connectivity with diverse authentication: coupon, OTP, password entry. Our management protocols prioritize traffic for better user experience across varied networks.

Wi-Fi authentication protocols secure networks, utilizing methods like WPA3, WPA2, and EAP for safe and reliable connections.

Website Development

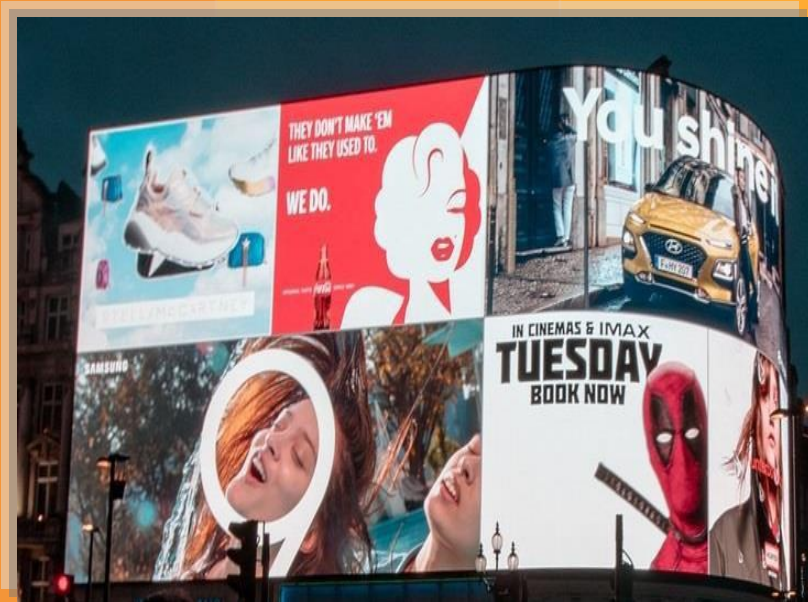

We develop websites for the Internet or intranet, ensuring alignment with client and user requirements. Working collaboratively, we employ programming languages to build robust foundations, integrate with databases, and maintain optimal functionality and performance.

Digital Display and Printing

Embracing the booming trend of digital printing, **we** specialize in various products such as banners, rigid signs, flags, decals, event materials, small-format items, photo and home décor, signs for different purposes, magnets, A-frames, posters, and more. Utilizing inkjet technology, we deliver versatile and high-quality printing solutions.

LED Display

We specialize in efficient LED displays, offering low-energy consumption suitable for handheld and chargeable devices. Our installations include conformal LED screens for real estate, commercial centers, and high-rise buildings. Diverse dot matrix display boards feature shapes like round, spherical, diamond, and more. Transparent LED screens serve outdoor stages, squares, parks, as well as indoor applications for malls, stores, and museums. LED Curtain Screens adorn building exteriors, and Zebra LED stage backdrops create dynamic landmarks. Rental LED screens cater to various events and venues.

Printing and Stationeries

Business stationery encompasses essential branded documents crucial for daily operations. Our focus lies in three key benefits for clients: maintaining brand consistency, elevating professional status, and fortifying networks and business relationships. Through Offset Printing, Screen Printing, and Digital Printing, we ensure high-quality, consistent stationery that leaves a lasting, professional impression, contributing to the overall success and image of our clients and customers.

Offset Printing: Bill books, challan books, school diaries, magazines.

Screen Printing: Marriage cards, visiting cards, object prints (cups, T-shirts), name plates.

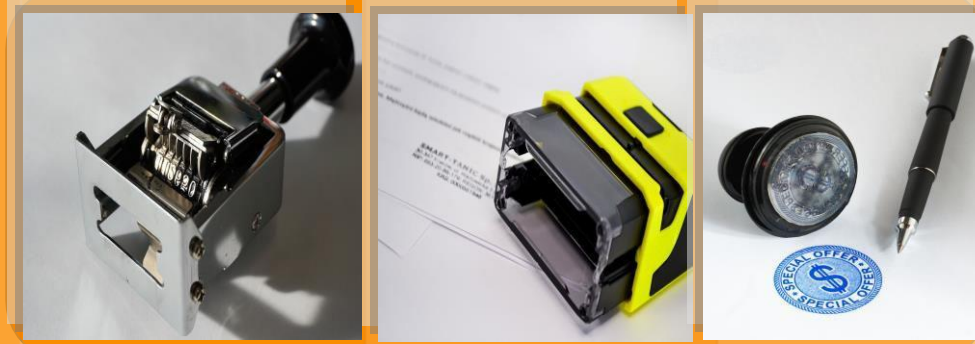

Digital Printing: Cards, certificates, stickers, photos.

PVC / ID card Printing

Utilizing PVC, we ensure high-quality ID card printing with a smooth finish, enhancing brand and logo visibility. **Our** focus is on superior printing to boost our client's brand image. We also offer lanyard digital prints for ID card holders. **Our** expert team emphasizes clear communication and thorough validation of themes, logos, images, text, and fonts to protect business brands and uphold organizational copyright standards during the printing process.

Polymer / Self Ink Stamp

We provide cost-effective and durable polymer/rubber stamps in various sizes, customizable with text or logos. Our traditional rubber stamps are a budget-friendly option, accommodating large sizes up to 6" x 4". Our product range includes computerized self-ink stamps, pre-ink stamps, signature stamps, date stamps, address stamps, pocket stamps, round stamps, stock stamps, and pen stamps, ensuring the best quality and variety.

We also deal with Spiral binding, Book binding, Hard binding, Photo and Frame binding in various customized quality.

QUICK SOLUTION

Office Stationery

We supply manufactured writing materials, including cut paper, envelopes, writing implements, continuous form paper and other office supplies. Stationery includes materials to be written on by hand or by equipment such as computer printers. We supply some of the following like notebook, printer paper, sticky notes, Highlighters, markers, pen, staplers, binders, Files or registers, ink/tonners, ballpoint, erasers, Label, Calculators, Computer supplies, Continuous stationeries, Desk, Glue, Envelop, Pencil, Tape, Paper, Paperclips, Greeting card etc.

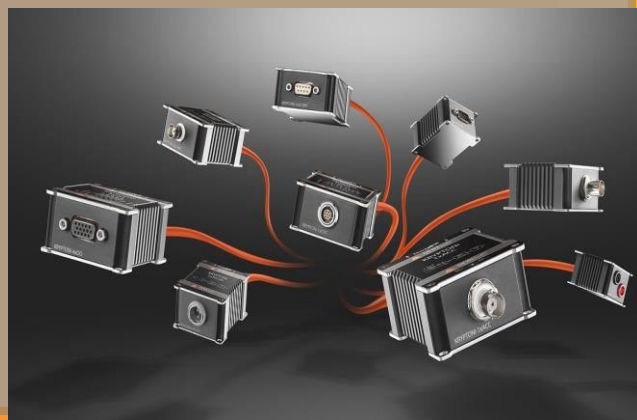

QUICK SOLUTION
"One Stopage for all Technologies"

Sound and PA System

Our PA system installations cover diverse settings –live music venues, conference rooms, and educational spaces. From small portable to large distributed systems, we consider factors like amplifier power, mixer channels, and speaker type. We prioritize client satisfaction, allowing them to assess sound quality before installation. Our expert technicians ensure optimal soundcraft design tailored to each environment.

Electrical Infrastructure Management

Staying current with power infrastructure technology is crucial for safety and continuity. **We** specialize in electrical cabling and layout management for diverse settings. Our systems ensure safety by monitoring, diagnosing, and controlling electrical networks in offices, homes, commercial buildings, shops, and showrooms. Automated switching under fault conditions enhances reliability. Our in-house engineers leverage advanced knowledge to design and implement industry and home solutions, incorporating Telecontrol & Automation, Substation Protection Relays & Schemes, Monitoring & Diagnostic Solutions, and DC Power and Backup Solutions for optimal performance and safety.

Automation System

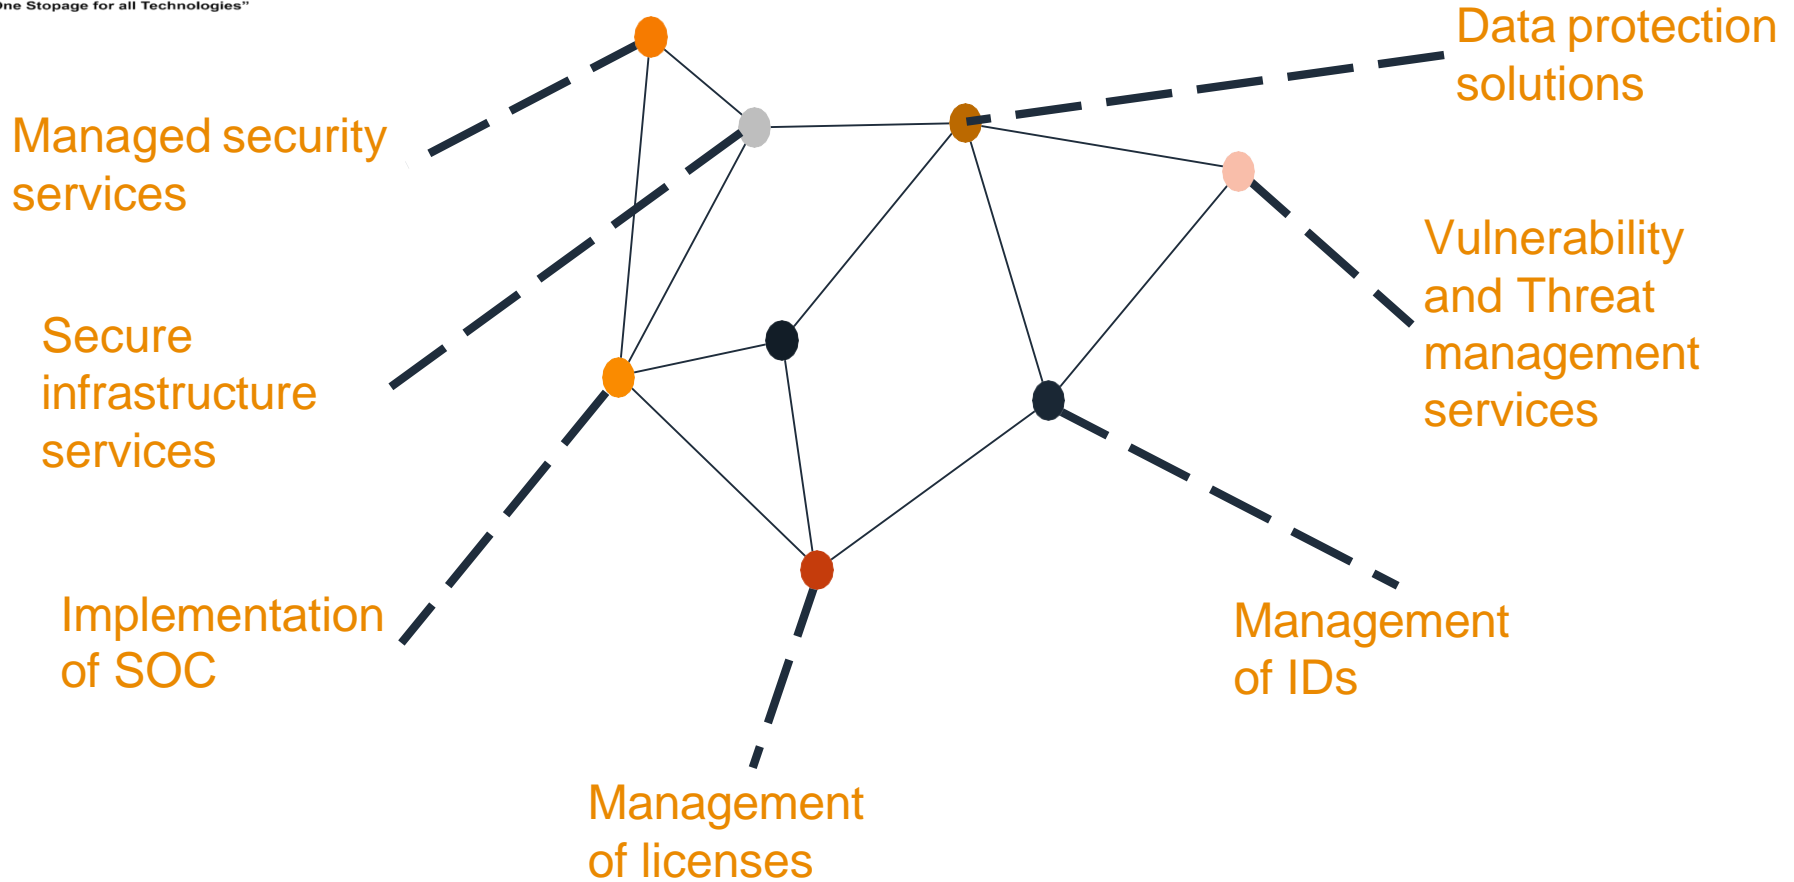

Our Electric power automation integrates electro-mechanical and digital feedback for high-voltage transmission system protection and diagnostics. Applying physics, electricity, and chemistry principles in industrial instrumentation, we automate diverse processes in the electric power industry. This includes managing electrical energy flow across long distances, utilizing sensors, control elements, and computation devices. Our systems, involving Single line, Potential Transformers, Current Transformers, SCADA, Protection relays, Circuit breakers, and disconnection, incorporate advanced digital communication subsystems for efficient data exchange and critical information dissemination in wide regions.
